<sup>1</sup>Cebu Divestment completed but will operate as the Technical Services Provider until Dec'26

^ YoY Change - Muted growth in traffic (specifically International traffic) was attributable to temporary disruptions in flight operations, which were caused by shifting airspace conditions amid a series of continuing geopolitical events and the current macro-economic situation

**Airport traffic in India has been impacted by ongoing geopolitical instability in the Middle East since 28 Feb'26. Despite these global systemic challenges, India's Aviation sector is actively navigating operational headwinds to maintain connectivity and resilience**

Medan airport domestic traffic has been affected by supply-side constraints as a portion of the aircraft fleet remains grounded due to maintenance-related issues - a challenge currently impacting the broader Indonesian aviation market
